A global business network specialised in sales and sourcing of industrial raw materials and products

Main products and markets

A multinational and multicultural team of entrepreneurs

Challenged by international competition, you and your company may be looking for new sources and markets for your business. In order to succeed a quick entry in the international marketplace you will need an organisation and marketeers with the experience to do so. Qualiteam International can offer you both.

Qualiteam International is a global business network created in 1993 by professionals in the field of industrial marketing.

At Qualiteam International we cooperate with leading industrial companies and distributors who have entrusted us the marketing, sale and purchase of their products, raw materials or equipment.

Qualiteam International has a solid experience in a wide range of industries, products and markets.

Our competences and activities comprise:

- ferrous and non-ferrous metals, semi-products and fabricated goods thereof
- heavy equipment and tools for the metal industry
- curtain walls
- high-tech equipment

- electrometallurgy products
- specialty chemicals
- precious metals
- food ingredients
- composite materials
- ceramics
- high performance fibers

Markets include:

- building
- transportation
- electronics

- packaging
- aeronautical and military markets
- engineering

Each of the key representatives and associates has an extensive network of contacts in business circles and society at large, both locally and internationally. The representatives and associates are linked by relations of

trust and mutual respect obtained by long team-work in the industry. Qualiteam International has representatives in the major industrial centres of the world and is present in Europe, the Americas and Asia through its key representatives and their companies. Through its associated representatives the network is also active in Africa, the Middle East and China.

All representatives have a long experience as general managers and executives in international marketing and sales of industrial products in Europe and/or the Americas, the Far East and Africa.

Competence includes international trade of commodities and engineering products, export financing, general business and sales representation, business development of high-tech products, project management, strategic and marketing planning, consultancy on acquisitions and strategic alliances.

All key representatives and associates are multilingual.
